

Calibre C502 tourbillon

Manually wound tourbillon movement. Calibre C502 is a tourbillon movement offering an excellent quality/price ratio. It is designed for personalisation in order to match the aesthetic and functional criteria of each client. Additional functions may also be added on the dial side. It is produced and assembled in partnership with the Compagnie Horlogère Locloise SA which also does the casing up for clients who so wish. We are happy to respond to your specific requests.

Informations techniques
